

## Sharing *Jesus* Making *Disciples*

### Ministry Vision

God has a plan for spreading the Gospel in Japan. Even now, He is preparing the hearts of many. As workers in His Kingdom, we are ready to join with the faithful already in Japan to help lead more precious souls toward a saving faith in our Lord Jesus Christ.

### Our Calling

We feel that God has given us specific gifts and experiences in order to equip and prepare us for His work in Japan. Through relationship building, preaching, teaching, mentoring, and serving we hope to share the love of Christ with everyone. The hope offered by the Gospel is truly needed in Japan.

### Tachikawa City

We will be working with the Tachikawa Church of Christ, a small but faithful congregation in this western suburb of Tokyo. Tachikawa City is urban and bustling, but it's a bit more relaxed than central Tokyo. There is a rich mix of young and old, including a high concentration of families with young children. We see great opportunity for connecting and relating with precious souls in this area.

### Spiritual Context

Japan has a large, modern population of over 124 million people. Less than 1% have connections to Jesus. Buddhism and Shinto are ubiquitous, but most are not religious in a meaningful sense. Tradition and conformity are powerful cultural forces, making this a challenging mission field.

### Financials

Help us reach Japan in August 2026. We anticipate costs to be:

#### Monthly Budget

– \$4,500 (recurring)

#### Startup Costs

– \$20,000 (one-time)

We are working with the Cloverdale Church of Christ in Searcy, Arkansas. Visit the "Give Today" page on our website for info.

### A Bit About Us

We have served God together for nearly three decades, raised two kids (who now have their own spouses), and bring years of experience to this work – both at home and abroad. God is doing great things in Japan, and we are humbled to be used by Him.

See our *2026 Missions Prospectus* for many more details and ways you can get involved. A PDF is available for download upon request.
